Masterclass AI governance

Set up and adjust your governance to introduce AI successfully, safely and compliantly.

> How do we govern AI safely, compliantly and for value?

Who it is for

- Supervisory board, also legal and risk
- Maximum 10 participants
- A laptop with permission to install tools, for the short hands-on session

What you leave with

- The AI literacy a director needs to oversee AI with confidence
- A view of the global AI governance and regulatory landscape, and what it asks of your company
- A practical model for board oversight, assurance and control of AI
- Governance that enables value creation instead of only containing risk

Format

Duration	1 day
Format	Interactive, with a short hands-on session
Audience	Supervisory board, also legal and risk
Delivery	Location, language and remote suitability agreed per engagement.
Group size	Maximum 10 participants
Language	Agreed per engagement
Price	Tailored proposal

About

This masterclass shows how to set up and adjust your company's governance structures to introduce AI successfully, safely and compliantly, for productivity, cost containment and new business. It covers what directors need to know to meet their duty of care on AI, from literacy and strategy to risk, regulation, assurance and decision-making.

Contents

Includes a short hands-on session with agentic AI; the agentic experience is the full, half-day version.

Brief agentic hands-on experience
A short hands-on session with agentic AI. The agentic experience is the full version.

AI strategy, value creation and the board
How AI creates value, and the board's role in the strategy.

The global AI governance and regulatory landscape
The rules and frameworks that apply, and how they are changing.

Data governance, privacy and AI
How data governance and privacy carry over to AI.

Board oversight, assurance and control of AI
How the board gets assurance, and what control looks like.

Sector applications and the future of AI governance
How governance applies in your sector, and where it is heading.

AI literacy for board directors
The concepts a director needs to follow, question and decide.

Responsible AI: trust, ethics and board oversight
What responsible use means in practice, and how the board oversees it.

AI risks, harms and board accountability
The risks and harms AI can cause, and where accountability sits.

Designing effective AI governance
Structures, roles and processes that work.

AI governance, judgment and decision-making
Making sound decisions about AI, and about decisions made with AI.

How it works

1. **Before.** We agree the board's context with the chair or the company secretary. Directors can take the personal fluency check beforehand once it opens.
2. **The session.** One full day of interactive sessions, frameworks and exercises, including a short hands-on session.
3. **After.** Presented materials and templates are shared. Optional recordings and transcripts are agreed with participants.

How to book

Request this session at grow.studio/contact, or email jaco@grow.studio.

Location, language and remote suitability agreed per engagement.
