Audience	Executive team and board
Delivery	Online at diagnostic.grow.studio, by invitation
Group size	Target: 15 respondents
Language	Agreed per engagement
Price	Tailored proposal

About

The AI strategy diagnostic is a web application with 49 closed questions in seven dimensions, plus one open question. It establishes the current state of your company's AI strategy, governance and deployment. Agents analyze the answers and scores against success and failure patterns drawn from experience and research, and build a diagnostic report. In parallel, we analyze your company's public online presence and prepare a report on possible AI initiatives in cost reduction, productivity and new business. How much it yields depends on how much public information is available.

The process

1. **Request an invitation.** Grow.Studio reviews each request before sending an invitation.
2. **Answer online.** Your leaders answer 49 closed questions in seven dimensions, plus one open question.
3. **Analysis.** Structured scoring, AI-supported analysis against success and failure patterns, and consultant review.
4. **Report and discussion.** We take you through the diagnostic report and the report on possible AI initiatives.

What you receive

- Professional PDF report
- A diagnostic report on your AI strategy, governance and deployment
- A report on possible AI initiatives in cost reduction, productivity and new business
- Priorities for discussion by the executive team and the board
- Consultant review and additional opportunity analysis included

The diagnostic runs at diagnostic.grow.studio, a separate app with its own privacy terms. A one sided NDA is issued by Grow.Studio to protect the privacy of the answers and the generated report. The public-information analysis uses only what your company publishes online.

How it works

1. **Before.** Request an invitation. The requester is default coordinator for your company and can manage further invitations and the deadline. Best results with at least 5 and not more than 15 respondents.
2. **The session.** Your leaders answer online, each on their own.
3. **After.** We review the results with you. Where deeper investigation would help, a deep-dive diagnostic is scoped and agreed separately.

How to book

Request a conversation at grow.studio/contact, or email jaco@grow.studio.

Location, language and remote suitability agreed per engagement.
