Executive AI Program

Five steps that prepare the executive team to design, lead and deploy the AI transformation.

> How does an executive team prepare to lead the AI transformation?

The steps

1. **AI strategy diagnostic** · Online, by invitation
   Where does our company stand on AI strategy, governance and deployment?
2. **The agentic experience** · Half day, hands-on
   What can AI actually do, experienced first-hand?
3. **Masterclass AI company transformation** · 1 day
   How do we design, run and scale the transformation?
4. **Masterclass leadership in the age of AI** · 1 day
   How do leadership, organization and the workforce change?
5. **Executive advisor, team advisor or Fractional Chief AI Officer** · Ongoing, as the transformation needs
   Who challenges my thinking every week? Who equips the team with method, templates and experts? Who owns the AI agenda until we can?

What your team has at the end

- A clear picture of where the company stands on AI strategy, governance and deployment
- First-hand experience of agentic AI across the team
- The playbook for the AI company transformation
- Leadership, organization and workforce choices for the age of AI
- Ongoing support through deployment, at the depth you need

Why this sequence

The sequence starts with the AI strategy diagnostic, so the team knows where the company stands before it decides what to change. The agentic experience gives every member first-hand experience of what AI can do.

The transformation and leadership masterclasses then build the playbook for the company transformation and for how leadership, organization and the workforce change. Advisory carries the work through deployment.

How it can be tailored

Every step can be booked on its own. After the diagnostic, steps can be merged, reordered or skipped, and the advisory step is chosen to fit the depth of support the transformation needs.

How to book

Request this path at grow.studio/contact, or email jaco@grow.studio.

Steps can be agreed individually. Delivery, availability and pricing are confirmed in the proposal.
