Masterclass leadership in the age of AI

Convert more analysis, broader expertise and faster execution into better performance.

> How do leadership, organization and the workforce change?

Who it is for

- Executive team
- Maximum 10 participants
- A laptop with permission to install tools, for the short hands-on session

What you leave with

- Clear choices on valuable outcomes, priorities and accountable owners
- An organization design built around the dependencies that determine performance
- The executive AI fluency to identify opportunities, direct work and evaluate results
- Delegation and oversight that hold up under real operating conditions
- A plan for the workforce transition and the use of productivity gains

Format

Duration	1 day
Format	Interactive, with a short hands-on session
Audience	Executive team
Delivery	Location, language and remote suitability agreed per engagement.
Group size	Maximum 10 participants
Language	Agreed per engagement
Price	Tailored proposal

About

AI gives companies access to more analysis, broader expertise and faster execution. The leadership opportunity is to convert those capabilities into better performance: better customer outcomes, lower operating costs, stronger decisions and commercially attractive new services. This masterclass covers what that asks of leaders, the organization and the workforce.

Contents

Includes a short hands-on session with agentic AI; the agentic experience is the full, half-day version.

AI fundamentals for board directors
The concepts leaders need to direct work and decide.

Brief agentic hands-on experience
A short hands-on session with agentic AI. The agentic experience is the full version.

Personal productivity
Using AI on your own work, every day.

Leadership responsibility
Choose valuable outcomes, settle competing priorities and give accountable owners the means to deliver.

Organization design
Arrange work, authority and shared services around the dependencies that determine performance.

Executive AI fluency
Develop the ability to identify opportunities, direct work, evaluate results and adapt the use of AI.

Leadership models
Combine central standards, local expertise and automated execution to suit each part of the business.

Delegation and oversight
Define what systems may do and ensure that intervention works under real operating conditions.

Executive effectiveness
Use AI to improve preparation, judgment, communication and follow-through.

Workforce transition
Renew expertise, maintain career pathways and decide how productivity gains will be used.

Transformation delivery
Manage an enterprise portfolio with business ownership, funded change capacity and clear investment decisions.

Enterprise performance
Manage the interactions among speed, attention, authority, learning and resilience as deployment expands.

How it works

1. **Before.** We agree your context and priorities beforehand. Participants can take the personal fluency check once it opens.
2. **The session.** One full day of interactive sessions and exercises, including a short hands-on session.
3. **After.** Presented materials and templates are shared. Optional recordings and transcripts are agreed with participants.

How to book

Request this session at grow.studio/contact, or email jaco@grow.studio.

Location, language and remote suitability agreed per engagement.
